

Word Association Test during Hypnoanalysis was 'hi-jacked' by dark entity.

Always be aware of the 'glamours' of the Astral World. By developing intuition and higher states of consciousness, we may be able to discern if these beings are indeed from higher worlds of love, beauty, righteousness and truth, or simply astral lords posing as such.

We had a wonderful Hypnoanalysis course last weekend, but after training for more than 10 years, I realized after a few words of the Word Association Test, that it was a dark entity that answered the questions, and not the student. The body language and voice changed; quite a surprise!

Hypnotherapists should be aware of the glammers of the Astral World. Many people have stories of being abducted by Aliens, but during regression we discover that it was not a physical experience, but in reality an out of body (astral) experience. These so-called ET's are beings deceived by the darkness who believe that they are special and from another planet; not true!

There are indeed higher beings that communicate with humanity, but they are very respectful, humble, honest, patient, usually soft-spoken and truthful, wise, patient and loving. If you do spirit

release work, be aware of beings who say they are from the light, but turn their back on you, are rude, sarcastic, impatient, or in a hurry! They may appear as 'angels' or 'masters'.

More than anything else, make sure that your own life is in order, meaning that if you work with the spirit world, live a life of honesty, love, truth, beauty, cooperation, righteousness, striving towards more beauty in serving humanity. The only protection we have, is to live a life of harmlessness.

No Hypnotherapist, Ethnopsychologist or Traditional Healer can escape the possibility of being deceived by earth-bound or dark entities, as therapists who work in the light, serving humanity and listen to the will of God, are always a challenge to the dark ones; like a candle attracting moths. It is therefore advisable to develop your intuition and higher psychic abilities, and move away from the glimmers of lower psychism. It is only in the silence of the higher worlds, that we hear the voice of our inner wisdom, and the voice of God within. We learn with time to trust our intuition, and begin to see the client/patient's past life & current life issues as we work.

This ability to 'see', makes therapy much easier, and when combined with the ability to see the difference between the 'real' and the 'unreal', the difference between truth and deception, we thank God for the trust in us. It is really amazing that we can 'see' other people's things, as long as we honour that trust through integrity, and serve humanity as a humble servant of God.
